## Imagine the possibilities...

---

Every day, Keystone Hardscapes helps turn possibilities into realities: an intimate backyard gathering space to entertain family and friends... a plaza with a unique, stylish ambiance... a stunning driveway and walkways to make that great first impression...

Keystone Hardscapes is where beauty, versatility and function meet. Since the 1980s, our products have been installed in thousands of residential and commercial properties. Our innovative pavers, walls and outdoor living elements continue to be favorites of homeowners, contractors, designers and developers.

Locally made products, nationally trusted brand. Trust us to help bring your next project to life.

Dimensions are nominal.

## Color Variations

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

## The Nature of Efflorescence

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

# ACCESSORIES

## Quikrete® Products

Contact Your Local Representative for availability on the full line of QUIKRETE® products such as bagged concrete mixes, concrete repair products, and masonry products.

## Commercial Grade Polyurethane Construction Adhesive

High performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.

*Use For: Repairing broken concrete • Bonding retaining wall block and caps*

## Geogrid

Geogrid is geosynthetic material used to reinforce soils and similar materials. Geogrids are commonly used to reinforce retaining walls, as well as sub-bases or subsoils below roads or structures. Soils pull apart under tension. Compared to soil, geogrids are strong in tension.

## Filter Fabric

Filter Fabric is a geotextile having a primary function of allowing water to pass while keeping soil fines from migrating through the fabric.

Geogrid

Filter Fabric

## Polymeric Sand

Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers / stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

*Use For: Driveways • Sidewalks • Pool Decks • Patios*

## SEK SureBond Products

Choosing interlocking paving stones for your home is an investment that needs to be protected. Surebond Joint Stabilizing Sealer does just that by bonding joint sand and sealing the pavement surface. Bonding joint sand maintains the structural integrity of the system – stones won't move, sand won't wash out, and weed and ant problems are reduced, all while sealing the surface to protect it from oil, salt and food staining as well as maintaining the natural color of the stone.

### Features and Benefits of SB-1300 and SB-7000 Water-Based Sealers and Joint Sand Stabilizers:

- Immediate Application - The ONLY sealers that can be applied IMMEDIATELY after paver installation.
- Coverage - An average of 100 sq ft / gallon and lasts 3 to 5 years indoors and outdoors, on old and new pavements, concrete, clay, and natural stone paving.
- UV-Resistant - Will not yellow.
- Breathable - Will not trap naturally occurring efflorescence.
- Resists freeze/thaw damage and will improve surface durability.
- Solvent-free - Meets or exceeds all VOC and EPA standards.
- Maintains joint sand height, reducing weed growth.
- Maintains horizontal friction by bonding the sand between units.

### Features and Benefits of SB-5000 STAIN-BLOCKING SEALER:

- Protective - Resists a wide variety of penetrants including water and oil.
- VOC-compliant - 50 g/l and safe to use.
- Environmentally friendly - Water-based product will not harm plants or surrounding landscape.
- Invisible - Does not change the appearance of the substrate.
- UV-resistant and stable - Does not yellow in sunlight and protects substrate from fading.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how they may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or freestanding walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
